SUMMARY

Backend Engineer and Project Manager with experience building scalable systems using Node.js and PostgreSQL, as well as mobile app development as an alumnus of the Apple Developer Academy. Experienced in turning user needs into technical solutions, including developing a complex HRIS payroll and attendance system. Passionate about creating reliable backend systems and leading teams to deliver products smoothly.

WORK EXPERIENCE

Project Manager Part Time | PT Visi Karya Nusantara Jan 2026 - Present

- Led an Agile team of 3 developers, managing daily standups, sprint planning, and weekly stakeholder updates.
- Translated client requests into clear Jira tickets and product backlogs for the development team.
- Guided backend architecture by collaborating on database schemas and system design for new features.
- Launched integrated features, managing client communication to successfully ship the Overtime and Pro-Rate payroll modules.

Software Engineer Intern | PT Visi Karya Nusantara Aug 2025 - Jan 2026

- Developed backend services using PostgreSQL, Express.js, and Node.js, with frontend work using React.js.
- Managed source control and collaboration using Git, ensuring smooth development across teams.
- Contributed to building an HRIS product by implementing key payroll features including contract management, payslip generation, overtime calculation, and onboarding setup for new clients.

iOS Engineer Intern | Apple Developer Academy @BINUS Mar 2025 - Dec 2025

- Collaborated with more or less 25 peers across 6 project cycles.
- Built functional apps using Swift and SwiftUI.

Backend Engineer Intern | PT Ganda Visi Jayatama Jan 2025 - Jul 2025

- Built and maintained backend systems using PostgreSQL, Express.js, and Node.js for HRIS and payroll solutions.
- Implemented Leave Management features, ensuring accurate leave tracking and approval workflows.
- Built scalable backend systems for business solutions using structured development workflows.

EDUCATION

Universitas Multimedia Nusantara - Tangerang, Banten Aug 2022 - Aug 2026 (Expected)
Bachelor in Computer Science with GPA of 3.63/4.00

PROJECT EXPERIENCE

ComePet - Mobile Application Developer Sep 2024 - Dec 2024

- Developed a social media application for pet owners using Kotlin on Android Studio.
- Developed interactive features for pet sharing, social networking, and instant messaging.
- Delivered a user-friendly interface and smooth app performance to enhance the pet owner experience.

ORGANIZATIONS

Orientasi Mahasiswa Baru UMN 2024 - Head of Website Division Feb 2024 - Sep 2024

- Led cross-functional collaboration with 11 divisions while managing a team of 8 designers and developers.
- Directed end-to-end website production using Figma for design and React for development.
- Coordinated with 30 division leaders to align organizational strategies and operations.

SKILLS

- **Website Development** (ReactJs, PostgreSQL, ExpressJs, NodeJs)
- **Mobile Development** (Kotlin, Swift)
- **Dev Ops** (AWS EC2, Docker)
- **Design** (Figma)
